Workgroup Document Scanner

Designed for your most  
demanding office scanning

DR-3010C

**imageFORMULA**

When you need a dependable device for your most demanding workgroup scanning requirements, Canon's flagship scanner never disappoints. The DR-3010C delivers high quality results, is easy to use and handles the biggest workloads with ease.

## The high performance scanner you can rely on

### Superior speeds

Canon's DR-3010C is designed to effortlessly handle your ad hoc scanning requirements, as well as mission critical tasks, such as invoice, transactional or application forms scanning. Black and white, greyscale and colour scanning is carried out at a super quick 30 ppm (or 60ipm). Plus, this impressive performance is attainable when scanning at higher resolutions of up to 300 dpi for black and white and greyscale scanning

### Robust performance

Capable of handling an impressive 3,000 scans per day, the DR-3010C is the most productive scanner in its class. And with a document feeding capacity of 50 sheets at a time, even peak workloads can be comfortably accommodated, alongside regular day-to-day scanning tasks.

### One touch simplicity

Introducing the DR-3010C into your daily routines couldn't be simpler. Daily tasks, such as scan-to email, printer or searchable PDF, can be performed with one-touch simplicity, thanks to the device's nine programmable job buttons.

### Compact design

Robust performance is effortlessly combined with a compact, modern design, ensuring the DR-3010C can be placed discreetly on a desk or neatly on a small cabinet.

### Highly reliable scanning

Canon's Retard Roller Technology uses a reversing separator roller which - when coupled with the DR-3010C's slanted paper path - provides outstanding feeding and paper separation reliability across a diverse range of media types. The feeder handles anything from fragile documents to thick and embossed media, including business cards and ID cards such as driving licenses. It's even possible to scan A3 documents in Folio mode, unique for a scanner of this type. For added assurance, an Ultrasonic Double Feed Detection system ensures that any potential feeding problems are automatically identified and quickly rectified.

### Efficient, quality scanning

Numerous features such as auto colour detection, auto text orientation, and skip blank page are included, so there's no need to waste time pre-sorting your documents before scanning. Simply load and then let the DR-3010C do the work for you allowing you to be more productive.

An optical scanning resolution of 600 dpi ensures quality results every time. And with a host of the latest image processing features at your disposal: Advanced Text Enhancement, Colour Dropout, Moiré Reduction and Prevent Bleed Through, even hard to decipher documents become easier to read.

### Auto Power ON/OFF

The DR-3010C is the most energy efficient scanner in its class and can even be automatically switched on and off, in-line with the PC it's connected to.

Frequent scanning tasks can be pre-programmed at the touch of a button.

### Extensive software

The DR-3010C's impressive performance credentials are backed up by a range of equally impressive software packages.

**Capture Perfect** – Canon's versatile software scanning application offers a user-friendly interface and flexible file savings options such as searchable and encrypted PDF, Scan to Mail, Scan to Presentation and many other useful features.

**Adobe Acrobat 8 Standard** – The industry's leading application for the creation of PDF files, Adobe Acrobat features robust tools for document sharing and security, file commenting, and much more.

**Scansoft PaperPort SE** – This file management application is renowned for its intuitive and user-friendly graphic user interface, making it easy to store, organise, and retrieve your digital documents.

**Nuance OmniPage SE** – Convert original paper documents into editable electronic files through OCR.

**Presto! BizCard Reader 5 SE** – Scan business cards to convert and organise important contact information into a searchable database.

Unbeatable levels of reliability for all your document needs.
