Work smarter.

Save time. Save space.

Manage all your paperwork perfectly.

Archive all your office documents effortlessly with Canon's cost-cutting, time-saving DR-2580C workgroup scanner. It's capable of handling the widest variety of documents in the smallest possible space. So you benefit from optimal efficiency and ease for numerous scanning applications. Choose Canon's economical and reliable scanning solution and you'll always work smarter.

### Flexible flatbed option

Even bound documents - such as books, reports, magazines and passports - are no problem for the DR-2580C. With the handy flatbed option, you simply place them on the platen for perfect scanning. To add to convenience, the flatbed section is detachable. Use it when you need it. Remove it when you need the extra space.

### The compact choice

This ultra compact scanner has a very small footprint, so it fits neatly on your desk or even on a tiny counter top. Sleek and stylish, with an ergonomic design, you'll hardly notice it at all - until you need productive scanning that's right at your fingertips. Take advantage of the one workgroup scanner that fits the tightest spaces as well as the tightest budgets.

### Scan all document types

Convenient A4 scanning is just the start with the DR-2580C. It can handle small plastic cards, very thick and thin paper such as payment slips, all types of forms and a range of other materials - thanks to the addition of a special straight paper path. Whatever work you deal with, this smart and versatile scanner manages all applications smoothly and effortlessly.

*An added straight paper path enables smooth scanning of plastic cards and thick documents*

### Built-in reliability

With Canon scanners, you can always be sure of highly reliable paper feeding. The DR-2580C takes this even further with a new 'Rapid Recovery' system for fast resumption of scanning after any errors. Double feed detection and skew correction are also available. Plus an ingenious 'floating' mechanism has been developed to handle cards and other thick materials.

*Smooth scanning of plastic cards and thick documents*

Operating the DR-2580C is simplicity itself. To add to ease, there are three practical 'job' buttons at the top of the scanner. Just register your most frequently used operations and perform productive scanning at the press of a button. This includes 'Scan to Print', 'Scan to PC' and 'Scan to Mail' - so you save time and get more work done with less effort.

*Push button ease*

# Work faster.

## In colour or black and white, with the highest image quality.

There is no waiting around with the DR-2580C. Despite its compact size, it scans your documents fast and efficiently. Profit from productive black and white, 24-bit colour, greyscale and duplex scanning. You get high quality scans the moment you need them, even for hard-to-scan documents. All with sharp, clear and detailed images, whether for graphics, photos or the lightest text.

### The speed you need

Cut down scanning time and increase productivity with the DR-2580C. Scan all your black and white or greyscale documents at a rapid 25 pages per minute\* and colour work at 13 pages per minute\*. Double-sided documents can be scanned just as quickly - at 50 images per minute\* for mono and greyscale and 26 images per minute\* for colour. It's the easiest way to enjoy faster scanning in a smaller space.

\* A4 portrait/200dpi

### Superb image quality

Get high quality scans every time, even for difficult documents with shading and colour contrasts. The DR-2580C can capture the most intricate image details with a high optical resolution reaching up to 600 dpi. Auto shading adjustment helps provide stable and high quality scanned images. Plus a Colour Dropout feature automatically removes red, green or blue for far more efficient forms processing.

### Make light text legible

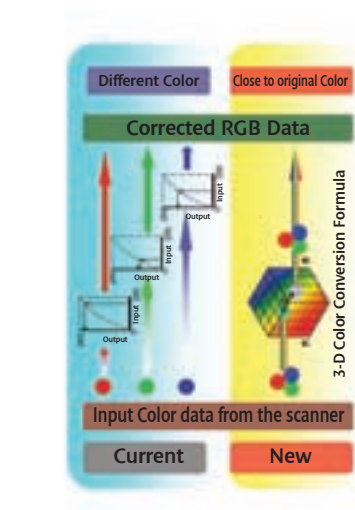

Scan light text, signatures or pencil marks without any problems using the advanced text enhancement mode, ensuring legibility at all times. What's more, the black and white contrast function allows you to scan light text on a light background or dark text on a dark background perfectly. You can always scan with confidence, without worrying about text becoming invisible.

### 3D colour correction

For unprecedented colour reproduction and accuracy, the DR-2580C features a special 3-dimensional colour correction function. This faithfully reproduces a document's colour information, by using a built-in conversion circuit to pinpoint the exact RGB colour coordinates. The end result is superb colour quality as well as enhanced readability for OCR scanning applications.

### Eliminate binder holes

When you're scanning from documents that have been kept in a binder, it usually leaves unsightly marks. The DR-2580C has a 'remove punch holes' function which automatically whites out these black dots. This applies to both sides of the page, so you always get clean and clear scans.

### Scan unsorted documents

Scan unsorted batches with ease, without having to keep on eye on the scanner at all times. The DR-2580C automatically straightens skewed documents and even rotates upside down or sideways images. Plus with features like Automatic Paper Size detection and Skip Blank Page you always get the results you want, while saving valuable working time.

*3D Colour Conversion formula*

Work effortlessly.

---

Save, share and find information  
the easiest way.

The DR-2580C makes it far easier to archive all your documents. But being able to find specific information when you want it - and share it with colleagues in the office or around the world - is equally important. That's where the DR-2580C really delivers. Powerful CapturePerfect software and Adobe Acrobat come standard with the scanner, to bring added simplicity to all your saving, sharing and retrieval tasks.

### CapturePerfect 3.0: the perfect solution

For total control over scanning, from start to finish, the DR-2580C comes bundled with CapturePerfect software. Combined with Canon's latest driver and scanner hardware functions, it offers a diverse range of tools to bring true versatility to an extensive range of applications. At the same time, the software helps optimise image quality and overall ease of use. So you gain in every aspect of your work.

### Create PDF files with time-saving text searching

Scanning and converting documents into PDF files also gives you another important advantage. With the DR-2580C, you can create text-searchable PDF files. This data can then be searched on your PC, using specific keywords for easy document retrieval. A security feature even allows you to encrypt scanned documents, so important information is fully protected.

Full screen image

Thumbnail images / Multi-window images

### Adobe Acrobat 7.0 for added ease

The DR-2580C offers a variety of file formats to choose from. It also comes bundled with Adobe® Acrobat® Standard, the industry's leading imaging application for the creation of PDF files. As more and more businesses choose to communicate via PDF files, which record a document's actual appearance, it gives you the ability to reach more people, more effectively.

### Display images any way you want

View images on your PC screen exactly as required. You can display a series of thumbnail images, at a reduced size. This allows the order of images to be altered with drag and drop ease. By splitting the image display window, up to four different images can be viewed. Or, of course, any image can be viewed at full screen size.

### Scan directly to email

In one quick and simple operation, you can prepare any batch of documents for immediate email distribution. Just scan a batch and the images will be automatically attached to a new message in your email software - ready to send to whoever you want. It's as easy and as efficient as that.

### Edit and rearrange files with exceptional ease

Edit and rearrange files as you want, when you want. You can create multi-page image files and add, remove or change the order of pages, through CapturePerfect's simple and easy-to-use interface. It makes digital document management easier and more convenient. You are in full control - with efficient filing always ready at hand.
