

PRODUCT UPDATE

The Epson GT-30000 now comes with a network interface as standard

Summary

- New name: GT-30000N
- New part code: B11B106031LN
- Pricing stays the same
- Stock is in distribution
- The old part code is no longer available

What's the difference between the GT-30000 and the GT-30000N ?

The only difference is that a network interface (Epson Network Image Express) is now included in the box.

Epson GT-30000N

Actions for resellers and distributors

- | | |
|-----------------------|--------------------------|
| • Change part codes | old: B11B106032DA |
| | new: B11B106031LN |
| • Change descriptions | old: GT-30000 |
| | new: GT-30000N |

Add a new bullet to the top of all feature lists (web-site/catalogues):-

- Now includes a network interface as standard
- Scan up to A3 size documents
- 30ppm at 300dpi Black/White A4 Landscape
- 15ppm at 300dpi Colour A4 Landscape
- 100 page Duplexing Automatic Document Feeder as standard

Feature Summary

- Now includes a network interface as standard
- 30ppm at 300dpi Black/White A4 Landscape
- 15ppm at 300dpi Colour A4 Landscape
- 100 page Duplexing Automatic Document Feeder as standard
- Network and two SCSI interfaces (1x50 pin, 1x68 pin)
- Quick start scanning button
- Xenon gas fluorescent lamp allows instant starting - the scanner is ready when you are
- 1 year on-site warranty

How does it ship

The network interface is included inside the scanner box. To install, the customer simply removes a cover plate at the rear of the scanner (two screws), slides in the network interface, and tightens two finger screws.
