INTELLIGENT. CONNECTED. BUSINESS-FRIENDLY.

The **Kodak ScanMate** i1180 Scanner Keeps in Step With Changing Business Technologies

CHALLENGE

Capture Documents and Extract Information Quickly and Efficiently

- The rapid pace of business requires greater productivity. Today, everyone needs more and more, faster and faster.

- Business applications are moving to thin client/browser architecture to benefit from the cost efficiencies of Web-based technologies.

- But companies can't deliver true "zero-footprint" capture solutions until imaging software is no longer installed on users' PCs. These traditional scanner imaging requirements increase IT support costs and limit the accessibility and scalability of capture solutions.

  A wide range of businesses face these common challenges including: banking, finance, insurance, healthcare, government and any other organization that adopts Web-based thin client solutions.

SOLUTION

Real-World Situations Addressed and Answered

Small, quiet, quick, and intelligently designed, the **Kodak ScanMate** i1180 Scanner is designed for the way you work today.

Minimize PC requirements, let the scanner do the work
The **ScanMate** i1180 doesn't need high-end desktop PC power because it already has advanced, on-board image processing built in.

We're virtual, Cloud (and even server/client) ready with a great SDK
The i1180 Scanner is Cloud- and browser-friendly, and the first **EMC® Captiva®** Cloud Toolkit licensed device. The software developer kit (SDK) aids adoption of Web/browser apps and lets you develop custom applications to perfectly match your needs.

Complementing the **ScanMate** i1180 Scanner, **Kodak** Info Input Solution is a thin client capture solution that can scan-enable your Line of Business (LOB) application and reduce infrastructure support costs.

Automatic barcode reading
Barcode reading helps make applications' file naming and document separation functions more efficient.

Intelligent Document Protection
Intelligent Document Protection "hears" problems and stops scanning instantly to protect and preserve valuable documents. Kodak Alaris' renowned paper transport technology helps assure jam-free, misfeed-free scanning of cards and documents.

RESULTS

Streamlined Processes, Happier Employees, Customers and Management

- No need to buy high-end PCs – reduce costs and extend life of current computers

- Customized apps developed easily with SDK for individualized needs

- Embedded image processing optimized for data extraction and Web capture

- Misfeeds and jams virtually eliminated to save time and hassles

- Easy integration into networked environments – PC, **Linux**, or mixed
