ScanSnap
Color Image Scanner
for Mac
S300M

Easy to use "one button" scanning!

Just press the "SCAN" button and the S300M quickly captures both sides of documents, presenting images as they are meant to be seen.

The Fujitsu ScanSnap S300M scanner provides a host of automatic image correction features to ensure great scanning results. Simply load a stack of documents into the feeder and press the "SCAN" button. The ScanSnap S300M automatically recognizes the size of each document, detects and corrects for skew, and shows images in their proper orientation with blank pages removed.

Powerful performance in a compact size

At nearly half the size of other ScanSnap scanners, the S300M is the world's smallest duplex ADF scanner designed to provide best-in-class mobile performance inside or outside of the home or office.*

*Statement was accurate for A4 ADF scanners as of October 2007

Double sided multi-sheet feeding

The ScanSnap S300M holds up to 10 letter sheets of paper in its automatic document feeder and scans up to an amazing 8 double-sided pages per minute. Able to scan paper of different sizes in a stack, the ScanSnap S300M can even feed legal length documents at the touch of a button.

Can operate on USB power

For added mobile convenience, the ScanSnap S300M can be powered through the Mac's USB port* when an AC power source is not available.

*When powered by USB only, the S300M uses two Mac USB ports; one for power and the other for transferring data. S300M comes with all required Mini-B type USB cables and an AC adapter.

Cardiris™ business card software

The Fujitsu ScanSnap S300M scanner comes bundled with Cardiris business card OCR software to quickly scan and store business cards into the Mac. Information taken from the card can be edited and then exported to Address Book, Entourage, AppleWorks, vCard, and others.
